Rotary Screen

- Compact and High Efficiency
- Shaft Mounted Drive
- Simple to Clean and Maintain
- Low Capital Cost
- Four Sizes for 200 - 500 tch
Unique features of the Bosch Projects Rotary Screen

- Compared to static screening, the unit is extremely efficient with minimal bypassing or recirculation of liquids.
- The unit is compact and has been designed for shipping in containers.
- The simple design of the unit provides up to 40% savings on capital costs. The screen has less moving parts than other rotary screens and therefore has a higher drive efficiency and absorbs less power.
- Separate screening of 1st and 2nd expressed juice in a single screen.
- The simple design allows for easy and cost effective maintenance.
- Installation is simple.
- The screen is suitable for a wide range of applications, such as mixed juice, clear juice and ash water.
- Choice of materials to suit the application.
- Choice of drive to suit the Client’s preference.
- Choice of aperture sizes, from 0.25 - 1.0 mm.
