

Agriculture Capability Profile

Global Engineering Solutions

A member of

Bosch Projects is a leading multi-disciplinary infrastructure and industrial consulting engineering and project management company providing value added packaged solutions for Clients in the public and private sectors.

As a strategic growth initiative in late 2016, the company was restructured by consolidating the infrastructure and industrial operating companies within Bosch Holdings (originally founded in 1961) into a single company offering more integrated professional services.

Bosch Projects operates from regional offices across South Africa and from our international offices in Kenya and Brazil, focusing on assignments within South Africa, Africa and on other continents.

Our company has a proud record of serving both public and private sector Clients in terms of technical excellence, and has received recognised product export and project excellence awards including SASTA, CESA, SAICE and IMESA utilising our ISO-certified Quality Management System. We have also successfully completed projects in more than 45 countries.

Capabilities

Bosch Projects has developed a long and successful track record in agriculture and in particular, the sugar industry. This capacity adds value to our global client base that stretches from Africa to the Americas and the Pacific Rim.

Projects undertaken range from feasibility studies and consulting services, to large construction and upgrade projects. The division offers a wide range of services delivered by a very experienced team. These services range from

site selection, design, layouts, through to a fully developed project, including tried and tested production techniques. A full range of harvesting and transport systems, designed to integrate with factory requirements, offers clients a complete solution to their development requirements.

Coupled with technical engineering skills, the team also has a wide range of managerial skills in production management and knowledge transfer areas of small and out grower development and large estate management.

Bosch Projects can undertake the following types of projects:

- Financial and economic feasibility studies
- Hydrological studies and reviews
- Soil surveys and nutrition
- Greenfield projects as well as vertical and horizontal expansion projects
- Abstraction and bulk water supply
- Irrigation and drainage design
- Design of irrigation canals and delivery systems
- Haulage and in-field roads to serve large agricultural estates
- Infield and road transport
- Infield mechanisation
- Agronomic and technical reviews
- Out grower schemes and development
- Estate management
- Agricultural waste management
- Environmental consulting
- Project planning, management and cost controls
