

Building Developments Capability Profile

Global Engineering Solutions

A member of

Bosch Projects is a leading multi-disciplinary infrastructure and industrial consulting engineering and project management company providing value added packaged solutions for Clients in the public and private sectors.

As a strategic growth initiative in late 2016, the company was restructured by consolidating the infrastructure and industrial operating companies within Bosch Holdings (originally founded in 1961) into a single company offering more integrated professional services.

Bosch Projects operates from regional offices across South Africa and from our international offices in Kenya and Brazil, focusing on assignments within South Africa, Africa and on other continents.

Our company has a proud record of serving both public and private sector Clients in terms of technical excellence, and has received recognised product export and project excellence awards including SASTA, CESA, SAICE and IMESA utilising our ISO-certified Quality Management System. We have also successfully completed projects in more than 45 countries.

Capabilities

Bosch Projects has a long and successful history of providing engineering support to clients in the building sector.

Types of building projects undertaken include offices, accommodation units, residential including low cost housing,

hospitals, retail and industrial including warehousing. This is applicable to both brownfield and greenfield sites.

Our services include assisting our clients in obtaining development rights, and implementing the engineering for the infrastructure and top structures, necessary to bring a development to fruition.

We have in- house, the required engineering skills to design the site services, top structures (steel and concrete), full building services including HVAC, Mechanical, Electrical, Wet Services, Fire and Building Managements Systems, thereby ensuring a one-stop shop for clients.

The above is undertaken by utilising Building Information Modelling (BIM).

We also offer project management, planning and cost controls, building energy and sustainability solutions.

Our clients have included private developers, industrialists, and government institutions who are developing their urban landholdings.

Bosch Projects has in-depth knowledge of development establishment processes, ensuring seamless integration with the development teams including that of architects and quantity surveyors.
